examples detail sheet

Syntax

```
<#@ output
extension=".fileNameExtension"
[encoding="encoding"] #>
```

Example

```
<#@ output extension=".cs"#>
```

@output

Syntax

```
<#@ assembly name="[assembly strong
name|assembly file name]" #>
```

Example

```
<#@ assembly name="c:\files\demo1.dll"
#>
```

```
<#@ assembly name="" #>
```

@assembly

Syntax

```
<#@ import namespace="namespace" #>
```

Example

```
<#@ import
namespace="System.Windows.Forms" #>
```

@import

Syntax
```
<#@ include file="filePath" #>
```

Example

```
<#@ include file="c:\files\demo1.tt" #>
```

@include

Syntax

```
<#@ parameter type="Full.TypeName"
name="PropertyName" #>
```

Example

```
<#@ parameter type="System.String"
name="Username" #>
```

@parameter
